### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

Applicant has claimed uniquely distinct features in the instant invention which are not found in the prior art, either singularly or in combination. According to the invention, a transaction device identifier, the identifier providing no apparent identification of a user authorized to use the electronic transaction device', communication logic configured to communicate the transaction device identifier to a system to perform a transaction, the system comprising a secure mechanism for correlating the device identifier and user; and a detachable memory device configured to include a public storage area and a private storage area, wherein the private storage area is to store confidential data that is to be encrypted with a key that is stored within memory of the electronic transaction device.

In another embodiment, a processor, an internal memory coupled to the processor, wherein a transaction device identifier is to be stored within the internal memory, the transaction device identifier to provide no apparent identification of a user authorized to use the electronic transaction device; a peripheral port coupled to the processor and the internal memory wherein the peripheral port is operable to be communicatively coupled to an external memory storage device, wherein the external memory storage device is configured to include a public storage area and a private storage area, wherein the private storage area is to store confidential data that is to be encrypted with a key that is stored within the internal memory of the electronic transaction device; and an electronic commerce process to be executed by the processor to cause
